

Changes to Carelon's (formerly AIM's) provider portal for medical oncology program

On May 14, 2023, Carelon Medical Benefits Management (formerly AIM Specialty Health®) will release enhancements to the provider portal for the medical oncology program. The goal of the enhancements is to make the process of submitting prior authorization requests easier.

Starting May 14, the look and functionality of the clinical intake screens will change. Among other changes, you'll notice:

- An improved look and feel in the case entry screens
- That biomarker questions are no longer presented for clinical scenarios to which the questions don't apply
- That changes to the drug dosing screens make it easier to enter cycle ranges and dates of administration

Register for a webinar to learn more
